

Gokul Padmanabha Reddy Chennuru

Sheffield, UK | +44 7554469608 | gokulreddy141@gmail.com | Portfolio: gokul-reddy.vercel.app

SUMMARY

Full-Stack Developer and Data Scientist with 1+ year of enterprise SaaS experience, having led a 19-member engineering team at L&T Technology Services. Currently completing an MSc in Data Science & AI at Sheffield Hallam University (graduating September 2026). Delivered large-scale micro-frontend platforms for global clients including Nokia and Patient Point. Passionate about building AI-powered, production-grade systems at the intersection of software engineering and machine learning. **I have the right to work in the UK.**

TECHNICAL SKILLS

Frontend: React 19, Next.js 14, Angular, TypeScript, Tailwind CSS, Vite, Micro-Frontends (single-spa)

Backend: Node.js, Express.js, C# .NET 8 (ASP.NET Core), FastAPI, gRPC, RESTful APIs, Apache APISIX

Data & AI: Python, R, PySpark, TensorFlow.js, Keras, Scikit-Learn, MediaPipe, OpenCV, NLP, LLMs (Gemini 2.0, Llama 3.1)

Cloud & Infra: AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, MongoDB, PostgreSQL, Redis, Kafka, RabbitMQ, GitHub Actions, Vercel

WORK EXPERIENCE

Associate Software Engineer · L&T Technology Services

Sept 2024 – Sept 2025

- **Led a 19-member team** to architect and deliver "Unified Dev Suite", an enterprise SaaS/CaaS platform using a single-spa micro-frontend architecture with highly reusable React and Angular components.
- **Architected a scalable Node.js backend with 190+ REST APIs** routed through Apache APISIX gateway, using MongoDB for user management and PostgreSQL for secure component licensing; deployed on the Azure Marketplace.
- Delivered custom component integrations for Nokia and Patient Point; integrated Power Apps for role-based access control, enabling enterprise-grade permission management across the platform.

PROJECTS

AI-Powered Interview Integrity Platform | MSc Final Year Project <https://interviewintegrity.onrender.com>

- **Built 29+ concurrent AI detection hooks** achieving 30 FPS face tracking (MediaPipe FaceMesh, 468 landmarks), real-time object detection every 2s (TensorFlow.js COCO-SSD), and sub-100ms violation logging latency across all active proctoring sessions.
- **Engineered a weighted integrity scoring engine (0–100)** combining gaze tracking, audio spoofing detection (Silero VAD), lip-sync mismatch, keystroke dynamics, and 10+ system-level signals (virtual camera, DevTools, screen recording) via Google Gemini 2.0 Flash.
- Full-stack implementation using Next.js 14, React 19, TypeScript, Tailwind CSS, NextAuth.js, and MongoDB Atlas; live WebRTC video interviews via LiveKit, deployed on Render with GDPR-compliant data handling.

EDUCATION

MSc Data Science & Artificial Intelligence — Sheffield Hallam University

Sept 2025 – Present

Advanced Machine Learning · Neural Networks · Big Data Analytics

B.E. Computer Science & Engineering — Chennai Institute of Technology

Aug 2020 – May 2024

Data Structures & Algorithms · Object-Oriented Programming · Database Management Systems

ACHIEVEMENTS & LEADERSHIP

- **MSc Final Year Project (First-Class):** Sole developer of the AI Interview Integrity Platform — a production-grade system with 29+ AI algorithms, presented as a live demonstration to academic panel; awarded top marks for technical depth and innovation.
- **Agile Team Lead:** Led a 5-member cross-functional team for the master's group project — owned 70%+ of planning, sprint coordination, and delivery, achieving a first-class graded outcome.
- **Client Delivery Recognition:** Recognised for stakeholder management and communication excellence through direct client-facing delivery for Nokia and Patient Point at L&T Technology Services.
