SUMMARY

Full-Stack Developer & Data Scientist currently completing an MSc in Data Science and AI at Sheffield Hallam University. Actively seeking Software Engineer roles, **Completing university studies in September 2026. Fully eligible for the 2-year Graduate Visa (no immediate sponsorship required).**

EDUCATION

MSc in Data Science and Artificial Intelligence | Sheffield Hallam University | Sep 2025 – Present

- **Modules:** Advanced Machine Learning, Neural Networks, Big Data Analytics.

B.E. in Computer Science and Engineering | **Chennai Institute of Technology** | **Aug 2020 – May 2024**

- **Modules:** Data Structures and Algorithms, Object Oriented Programming.

TECHNICAL SKILLS

- **Full-Stack Development:** React 19, Next.js, Angular, TypeScript, Micro-Frontends (single-spa), Tailwind CSS, Vite, Node.js, Express.js, C# .NET 8 (ASP.NET Core), FastAPI, gRPC, RESTful APIs, MongoDB, PostgreSQL, Redis, Docker, Kubernetes, AWS (EC2, S3, Lambda), Azure, CI/CD (GitHub Actions), Apache Kafka, RabbitMQ, APISIX, Vercel..
- **Data Science & AI:** Python, R, PySpark, Machine Learning (TensorFlow, Keras, Scikit-Learn), Computer Vision (MediaPipe, OpenCV), NLP, LLMs (Gemini 2.0, Llama 3.1), Data Engineering (ETL Pipelines), SQL, Pandas, NumPy, Data Visualization (Tableau, Matplotlib), Supervised and Unsupervised Learning, Neural Networks.

WORK EXPERIENCE

Associate Software Engineer | **L&T Technology Services**

Sept 2024 - Sept 2025

- Led a **19-member** development team to build "**Unified Dev Suite**," an enterprise **SaaS/CaaS** platform utilizing a **single-spa micro-frontend architecture** with highly reusable **React** and **Angular** components.
- Architected a scalable **Node.js** backend featuring 190+ reusable **REST APIs** routed through an Apache **APISIX gateway**, leveraging **MongoDB** for user management and **PostgreSQL** for secure component licensing.
- Deployed the platform on the **Azure Marketplace**, integrated **Power Apps** for role-based access control, and successfully delivered custom component integrations for high-profile clients including **Nokia** and **Patient Point**.

PROJECTS

AI-Powered Interview Integrity Platform - An advanced online examination and interview proctoring system powered by **29+ AI detection algorithms**, real-time computer vision, audio analysis, and behavioral analytics.

- Developed a production-grade, responsive application using **Next.js 14**, **React 19**, **TypeScript**, and **Tailwind CSS**, **integrating NextAuth.js** for secure authentication and **MongoDB Atlas** for database management.
- Engineered an advanced proctoring engine utilizing **MediaPipe (FaceMesh, Hand Landmarker)** and **TensorFlow.js (COCO-SSD)** for real-time gaze, gesture, and object detection, alongside **Silero VAD** and **Web Audio API** for audio spoofing and noise analysis.
- Architected a real-time behavioral analytics and integrity scoring system powered by Google **Gemini 2.0 Flash** and custom **ML algorithms**, featuring live **WebRTC** video interviews and deployed via **Render**. [<https://interviewintegrity.onrender.com/>]

ACHIEVEMENTS AND LEADERSHIP EXPERIENCE

- Led a **5-member** team using agile methodologies and contributed over **70%** to project planning and execution, resulting in first-class grade for the master's group project.
- Concurrently managing roles at Subway and Popeyes alongside full-time MSc studies, demonstrating strong operational adaptability.
